Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-3, 5, 10, 14-16, 18, 23, 27-29, 31, 36, and 40-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Musmanno et al 5,940,809. A method of configuring a dynamic database packageset switching program to obtain a database having processing parameter values used in processing financial transactions, wherein each processing parameter is associated with a predetermined financial transaction; entering a key value (334) in a first field of a template (300) displayed on a display screen of a monitor coupled to an FSO computer system, wherein the key value identifies information needed to process a financial transaction; entering a database identifier (UID) in a second field of the template displayed on the display screen, wherein the database identifier entered in the second field of the template comprises a database location of processing parameters (324) used to process the financial transaction identified by the key value entered in the first field; and storing the entered key value and the database identifier in a first memory coupled to the FSO computer system.

Musmanno shows the first field of the template corresponds to a key definition (334) where the first field comprises one or more key and the entered key value comprises entering key values in one or more key fields and displaying data elements, selecting one or more data elements (claims 2, 16, and 27-28) and creating and storing the key definition in a second memory (522/524; claims 3, 15, 29). Musmanno shows storing information that defines a relationship between first database 522 and first database identifier (UID) and the first database is a relational database (with 524 and col. 8, lines 26-49; claims 5 and 18). Musmanno shows a second database 524 including the first memory (claim 31) and a portion of one or more data elements comprise monitoring parameters (claims 10 and 36). As concerns claims 40-48, Musmanno shows the key value comprises two or more key elements and wherein the method further comprises specifying a sequence in which the key elements appear in the key value (abstract; claims 40, 43 and 46).

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
